Náš nábytek se musí používat podle předpisů. Používání v rozporu s předpisy může vést k věcným škodám a za jistých okolností také k zraněním osob. Nábytek není hračka. Za škody, které vzniknou používáním proti předpisům nebo nesprávnou manipulací, nepřejíme výrobce nebo prodejce žádnou záruku.

POZOR: Děti nebo osoby s mentálním postižením se musí neustále držet mimo díly nábytku, špičatých předmětů, drobných částí a obalových materiálů, protože hrozí riziko zranění a/nebo udušení.

MONTÁŽ: Při montáži dodržujte naš návod k používání, obsluze, instalaci nebo montáži a dávejte hlavně pozor na výstražné a bezpečnostní pokyny. Pokud se nebude dodržovat předpisy, může to mít za následek zranění osob nebo poškození nábytku / ohrožení bezpečnosti. Pokud byste měli potíže s instalací/montáží, kontaktujte naš servisní tým. Tento vám ochotně poradí a pomůže. Montáž smí provádět pouze kvalifikovaný personál. Při změnách na produktu/dilech produktu, při výměně nebo použití dílů/spotřebních materiálů, které nepocházejí od výrobce/prodejce, nepřejíme žádnou odpovědnost za škody.

Pokud jsou ke zboží přiloženy upevňovací prvky na zeď, jako jsou hmoždinky a šrouby, jsou tyto určeny výhradně pro použití na stěnách z pevných a jednolitých materiálů. Upevnění je jen tak dobré, jak dobré je spojení mezi upevňovacím prostředkem a stěnou. Před upevněním musíte zkontrolovat vhodnost vaší stěny pro stojící i závěsný nábytek a použít pouze vhodné spojovací prvky. Před případným vrtáním se ujistěte, že se v oblasti vrtání nenachází elektrické vodiče. Nakonec je za upevnění na stěnu odpovědný instaláční technik.

Plati to také pro instalaci elektrických produktů a dalšího stavebně-technického příslušenství. Montáž/installaci elektrických produktů a také dalšího důležitého konstrukčního příslušenství může provádět pouze autorizovaný kvalifikovaný personál. Veškeré elektrické a stavebně-technické instalace musí být provedeny v souladu s platnými normami a bezpečnostními předpisy ve vaší zemi. Pro světelné zdroje používejte pouze povolenou intenzitu osvětlení. Při nedodržení max. počtu Watt hrozí riziko požáru v důsledku přehřátí. Překryvání svítidel není povoleno z důvodu rizika požáru.

Dokončil funkci nábytku je zaručena pouze při vertikální a horizontální instalaci. Dveře jsou předem nastavené, můžou se ale znova seřídit/nastavit na základě místních podmínek. Dodržujte údaje o hmotnosti pro maximální zatlžení. Na nábytek se nesmí létat. Při neoborném použití může dojít k převrácení nábytku. Aby se tomu zamezilo, musí být nábytek neustále zajištěn proti převrácení. Při přetížení/hadmerném přetížení (zejména hrajícími si dětmi, lidmi, materiélem nebo jinými nevhodnými vlivy) hrozí riziko rozbití a zranění. Všechny šrouby a nosná spojovací místa by měla být dotažena po 5 až 6 týdnech, aby se zajistila trvalá stabilita.

PĚČE:

-Pokyny k péči o nábytek-

Dodržujte naše pokyny pro správnou péči o nábytek, abyste si naš výrobek mohli užívat co nejdéle. Při čištění používejte čistý, suchý a měkký bavlněný hadřík. Pokud potřebuje váš nábytek důkladně vyčištění, můžete hadřík navlhčit trochu vody nebo čisticího prostředku na nábytek a pak vyčištěné věci vysušit. Kovové a skleněné díly se nejlépe čistí běžně dostupnými čisticími prostředky na kovy a sklo podle pokynů, které jsou na nich uvedené. Na čisticích prostředcích musí být jasné uvedeno, že jsou vhodné k čištění nábytku.

V žádném případě nepoužívejte parní čističe, žiraviny, abraziva nebo jiné prostředky, jejichž účinky neznáte. POZOR: Vyoce lesklé povrchy jsou při dodávce chráněny ochranou fólií. Nechte fólii na nábyteku, dokud nebude zcela smontován a zbaven prachu. Vyoce lesklé prvky, ze kterých byla odstraněna ochranná fólie, lze čistit a používat až po 72 hodinách (doba pro následné vytrvrzení na okolním vzduchu). Povrchy nelze poškodit ostrými předměty a nikdy je nemůžete vystavovat silnému slunečnímu záření.

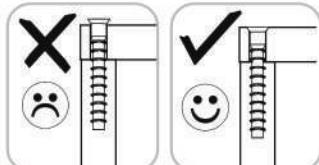

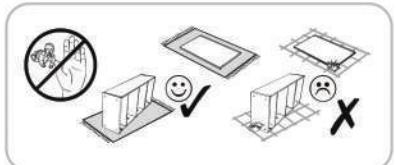

LIKVIDACE

-Pokyny k likvidaci odpadu-

V zajímu ochrany životního prostředí vyhazujte obalový odpad roztržiděný podle druhu do určených odpadkových/recyklačních nádob, v žádném případě nevyhazujte do přírody. Poškozený nebo nepoužitelný nábytek lze odeslat do speciálních sběrných zařízení k recyklaci jednotlivých dílů. Používaný, ale stále funkční nábytek není nutné hned likvidovat. Darujte je např. charitativním organizacím.

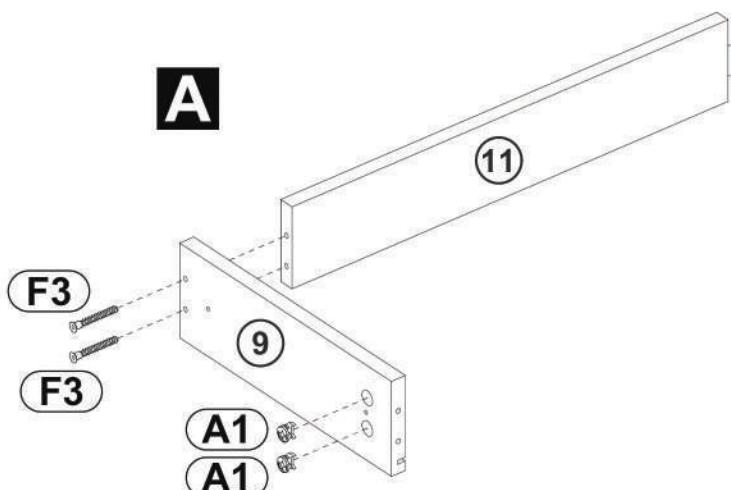

Přejeme vám mnoho zábavy s vašim novým nábytkem.
